 Great choice! Here are a few chicken dish options for you to consider:

1. **Lemon Herb Roasted Chicken:**

- **Ingredients:** Whole chicken, lemons, garlic, fresh herbs (like rosemary and thyme), olive oil, salt, and pepper.
- **Instructions:** Preheat the oven to 425°F (220°C). Rub the chicken with olive oil, salt, and pepper. Stuff the cavity with halved lemons, garlic cloves, and herbs. Roast for about 1.5 hours, or until the internal temperature reaches 165°F (75°C).

2. **Chicken Alfredo Pasta:**

- **Ingredients:** Chicken breast, fettuccine pasta, heavy cream, garlic, Parmesan cheese, and parsley.
- **Instructions:** Cook the fettuccine according to the package instructions. In a skillet, sauté minced garlic in butter, add sliced chicken breast, and cook until browned. Pour in heavy cream, stir in Parmesan cheese, and combine with the pasta. Garnish with parsley.

3. **Teriyaki Chicken Stir-Fry:**

- **Ingredients:** Chicken thighs, teriyaki sauce, bell peppers, broccoli, and sesame seeds.
- **Instructions:** Cut chicken into bite-sized pieces and sauté in a pan until cooked through. Add chopped vegetables and stir-fry until tender. Pour teriyaki sauce over the top and cook for a few more minutes. Serve with rice and sprinkle with sesame seeds.

What ingredients do you have?

DAY 12

WEEK 2

Topic:

Langchain Advanced.

Takeaways

Model Integration - How to connect OpenAI model.
 Imp variables Model, temperature, Invoke.
 Temp 0 → 1 0 → Focused 1 - Creative.
 We can use any models from Ollama, Claude, Gemini.
 Messages → How to talk to AI Model.
 Guardrail → Safe guard apply security.

Summary

Today they covered Langchain advanced topics.
 learnt how to integrate various models, and
 important properties. Also learnt ^{use of} Messages and
 type of Messages → System Msg, Human Msg.
 Later they explained about Guardrail, how to apply
 security, then how to use memory & streaming process
 in basic app. Finally demonstrated how to build basic
 AI application.

Today's Task

SUBMISSION STATUS	NOTES / REMARKS
☒ Submitted Task completed and shared	Understood the advanced Langchain concepts, and how to use streaming and memory of AI response. Also learnt how to build a basic AI application.
☐ Not Submitted Will catch up tomorrow	

Tick the box only when it's true. Lying to yourself is the only real failure.
